

KIKAGAI HYDROPOWER PROJECT

KIKAGATI EARTHWORK SURVEY FOR THE QUARRY AREA

PROJECT: KIKAGATI EARTHWORK SURVEY FOR THE QUARRY AREA
TYPE: HYDROPOWER AND HYDRAULICS
LOCATION: ISINGIRO, WESTERN UGANDA
CLIENT: KIKAGATI POWER COMPANY LIMITED
PERIOD: MARCH 2019

PROJECT OVERVIEW

The Kagera water supply infrastructure is a proposed project to improve water supply production and transmission for Mbarara urban district and a part of Isingiro district. The water treatment plant will be built on the banks of Kagera River. The project is being implemented by National Water and Sewerage Corporation that has assigned Cabinet MERLIN / ILF Joint Venture the detailed design and work supervision for Kagera Water Works.

As part of the detailed design and work supervision for Kagera Water Works, Proess was engaged to carry out a bathymetric survey for the Intake area along the Kagera River.

SCOPE OF WORK

Proess was engaged to undertake an earthwork survey for the Quarry Area.
